MetalWorx Mobile are fabricators and suppliers of a wide range of structural steel services, either fabricated on site or delivered:

- Structural Steel frame work
- House beams
- Flitch plates/beams
- roof joint plates

a bonus to using Metalworx Mobile for your next structural job is they are fully equipped with a crane truck for lifting if required and a mobile welder generator if power is not accessable or up to the requirements of a caddy welder.

Steel can be fabricated in the workshop and delivered to site for installation or fabricated on site and installed. Most deliveries are carried out by Metalworx Mobile to reduce transport costs for the customer, depending on the size / weight of the job.
